

NOTES:

There has been significant work already carried out in the part of the course, some cosmetic work will be required as shown.

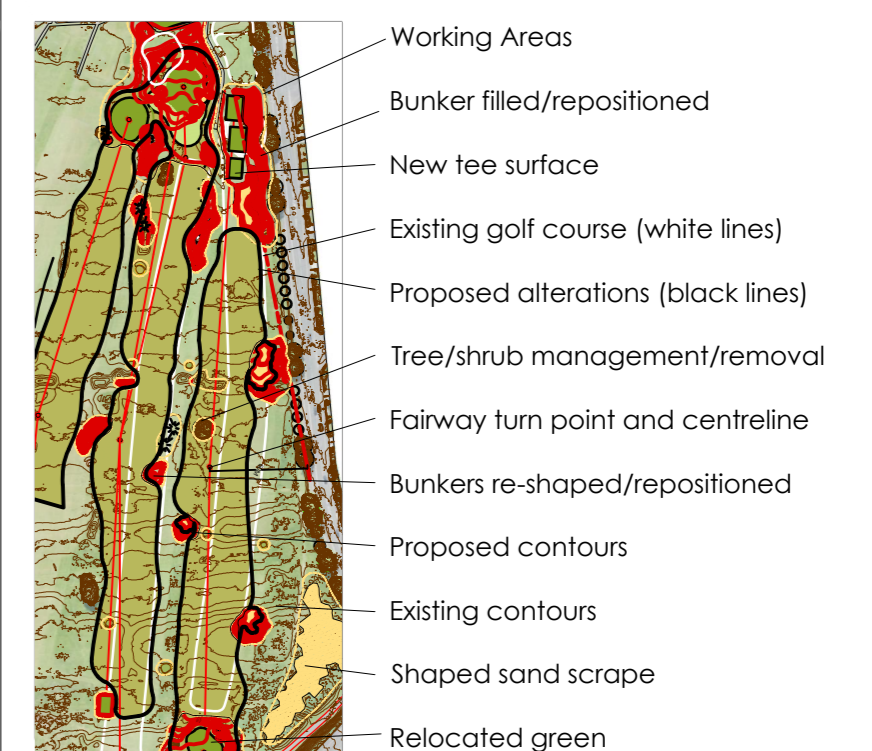

Some of the previous works requires some stabilisation work with turf and seeding due to unsuccessful grow in as a result of a lack of water.

A new par 3 12th will be installed to enable the next hole 13 to be made safer. This will allow for the 13th tees to be pulled back and a wider fairway landing area created. This will also see more golfer laying up to the burn on the second shot and help mitigate stray balls leaving the course.

Reinstatement of the links/heath will require careful management.
